

**Phonetics review: Vocal tract diagram**

- **Be able to convert from a mid-sagittal section diagram to an articulatory description / phonetic symbol, and vice versa**
- In order to be able to do this, you should be familiar with the following structures:

oral cavity	hard palate
nasal cavity	velum (soft palate)
tongue tip	velopharyngeal port
tongue blade	uvula
tongue body	pharynx
tongue root	larynx
lips	glottis
teeth	vocal folds
alveolar ridge
