

***Today's topic:***

- **Squib peer-review workshop**

# 0. Today's objectives

After today's class, you should be able to:

- Give feedback to a classmate about how clear, accurate and effective their squib presentation is
- Have ideas for how to revise your own squib project for the presentation on Thursday

# 1. Getting ready for the workshop

- Please upload your presentation file to *both*
  - the Canvas Assignment (for assignment credit)
  - the shared GDrive folder (for reviewer access)
- Prepare to make reviewer notes on *either*
  - the PDF reviewer form (transfer to GDoc later)
  - the GDoc reviewer form
- The noise level in the room may be tricky! Try to keep your voices relatively quiet (maybe spread out)

## 2. Workshop Rounds 1 and 2: 30 min each

- **Presenter:** Present your project to your reviewer; ask questions/advice along the way as needed
- **Reviewer:** If there is time left at the end, consider:
  - identifying anything that wasn't clear
  - making suggestions about the presentation content (or structure/format), if you have any→ If you made notes elsewhere, please input them into the **GDoc form** by **Tu Apr 28, 12:00 noon**
- I will provide presenters with a copy of reviewer's feedback (and mine) by **Tu Apr 28, 5pm**
