

How to learn in this course

Reminders:

- The work in this course **builds on past work**
 - Learning Assignments help you **prepare** for HW assignments
 - HW assignments help you **prepare** for exams
- The **lecture slides** and **W activities** point you to the information we are **focusing** on
- If you feel **stuck**, look for relevant information in the slides/activities and in the textbook

How to structure your week:

- **Before Monday:** Do the assigned reading for M
Finish the HW from last week
- **Monday:** Attend lecture (come in real time, or watch the Zoom video)
Review the reading and lecture slides
Do the assigned reading for W
- **Wednesday:** Work through the Learning Activities and review the reading
Use the Learning Assignment **to help you learn** the material:
Do you have questions about the Learning Assignment?
 - Review the M slides and the W slides and activities
 - Review the assigned readings
 - Post a question in the discussion forum for the week
 - Email your TA or JS, or **come to office hours**
Start the new HW assignment and prepare for recitation
Do you have questions about the HW assignment?
 - Review the readings, lecture slides, and learning activities
 - **Look at the feedback** on your Learning Assignment (available Th)
 - Post a question in the discussion forum for the week
 - Email your TA or JS, or **come to office hours**
 - Make a list of questions to bring to your recitation on Friday
- **Friday:** Attend recitation (or do the asynchronous recitation activities)
Look at the feedback on your HW from last week (usually available F)
Prepare for Monday's class
